Work Experience

Backend Developer

PT. Sigma Cipta Caraka

Jun 2022-Present

Bandung, Indonesia

An end-to-end IT solutions company providing enterprise IT services across payment systems, cloud platforms, and cybersecurity as a subsidiary of Telkom Indonesia.

- Developed and maintained a payment application using Go (Golang) and Vue.js, integrating a payment gateway to replace cash-based payments and ensure reliable transaction tracking and reconciliation.
- Migrated H2H payment services from C++ to Go, eliminating nightly application restarts, improving system stability, and reducing operational incidents during daily payment processing, while generating automated daily transaction reports.
- Built a financial monitoring dashboard using Laravel to provide real-time visibility into daily and monthly financial transactions, reducing manual reporting effort and improving accuracy.
- Developed an automated payment reconciliation system using Go, Python, and Vue.js, replacing a manual reconciliation process that previously took hours per day with an automated workflow that completes in minutes, significantly reducing human error.
- Implemented a digital assessment application using Go, gRPC, and React.js, supporting hundreds of concurrent assessment participants with a scalable and distributed service architecture.

Software Engineer Intern

Village Administration Office of Sindangpakuon

Jun 2020-Sep2020

Sumedang, Indonesia

- Developed a Java-based desktop application with a MySQL database to replace manual population data recording, ensuring data consistency, searchability, and reliable monthly reporting.

Education and Certifications

B.Sc. Informatics Engineering

Universitas Komputer Indonesia

Sep 2017-Aug 2021

Bandung, Indonesia.

- CGPA: 3.52/4.00

Technologies and Languages

- **Languages:** Java, Typescript, Go, Python, SQL, Rust
- **Web Technologies:** React, Svelte, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, Redis, Elasticsearch
- **Messaging:** Redpanda
- **Infrastructure:** Docker, Kubernetes, Git, GitLab CI/CD, Helm, Pulumi
- **Observability:** OpenTelemetry, AppDynamics, New Relic, Fluent Bit, Vector
- **Performance Testing:** K6 Testing, JMeter
- **APIs & Architecture:** RESTful APIs, gRPC

Projects & Achievements

- Google IT Automation with Python
- DevOps Foundations: Site Reliability Engineering
- Google Cybersecurity Professional Certificate
